In-Box

- Web Browser
- palmOne™ Media Player
- Adobe® Acrobat® Reader®

Sold Separately

- Resco Photo Viewer
- SplashBlog
- Pocket-DVD Studio
- ZagatTo Go

His Favorite Accessory:

GPS Navigator (sold separately)

Jeff finds himself always going somewhere, for either business or pleasure, and his inner photographer is always along for the ride. With 4GB** of storage his LifeDrive™ mobile manager makes the perfect camera companion, giving Jeff ample space for all that catches his eye.

California Coast

Jeff stops for a few photo ops he cannot pass-up. When the SD card in his digital camera reaches full capacity, Jeff takes a break at an outdoor café and transfers photos to his LifeDrive mobile manager through the SD card slot. Then he logs onto the café's Wi-Fi® network and launches the built-in web browser on the LifeDrive device so he can upload the new photos to his website†.

Back on the Road

Jeff gets in his car and continues his journey down Hwy. 1, connecting his LifeDrive device to the car charger†† so he's ready for the next photo op. Jeff stops at an art deco diner for lunch and can't resist taking a photo of it before leaving. He asks one of the waitresses to snap a picture of him sitting at the counter so he can email it to his wife later.

The Hotel

Jeff arrives at his destination and checks into the hotel. In his room he compiles a digital photo album of the day's journey on his LifeDrive device using Resco Photo Viewer.††† He then uploads the album to his personal website. When he's finished, Jeff entertains himself by playing a hand of "Texas Hold'em" on the device.†††
