You already know how much your PalmPilot does for you. But did you know how easy
and affordable it is to make it do even more? With the 1 MB Professional Upgrade, the
PalmPilot you use now will be able to do everything that the most powerful model, the
PalmPilot Professional Edition, can do. It's as simple as 1-2-3.

1. One Megabyte Of Storage.
With your busy life, you need more room! When you upgrade to a full megabyte of
storage you can save more names, addresses and memos; more appointments, reminders
and to do lists. With the additional capacity and functionality, there's plenty of room for
e-mail messages and shareware applications to help you be even more productive.

2. Two New Applications: Pocket E-Mail and Pocket Expense.
Here are two applications worth upgrading for: new pocket e-mail and pocket expense.

Pocket e-mail puts e-mail from your desktop right where you need it–on your
PalmPilot organizer! Download messages from your desktop computer, read e-mail,
write responses, even organize and delete messages when it's convenient for you. The
next time you perform a HotSync,™ your computer's mailbox is updated and all your
e-mail is routed to its destination, automatically.

Pocket expense makes keeping tabs on your expenses simple and convenient.
Just enter them into your PalmPilot, then press the HotSync button to export them
into your Excel expense form.

For Pilot 1000 and Pilot 5000 users, your 1 MB Professional Upgrade also lets
you take advantage of the new features we've added to the Palm OS version 2.0.
We've improved the Date Book to let you view your schedule a month at a time,
we've improved the Memo and To Do list applications with new sorting features,
and we've created new links between the Address Book and other applications, just
to name a few.

3. Three Easy Steps to Install.
In just a few short minutes, you can have all the power of our PalmPilot Professional
Edition. With the 1MB Professional Upgrade, no tools or special skills are required,
just three easy steps.
