PALM
COMPUTING®
PLATFORM

Enterprise Solutions for the Palm Computing® Platform

Through the vision of our partners and the imagination of our customers, the Palm Computing® platform has proven to be a powerful extension of the enterprise, as well as the handheld device of choice for millions of users.

Inside, you will find a sampling of the growing list of enterprise applications for Palm Computing platform devices, including PalmPilot™ Professional, Palm III™, Palm IIIx™, Palm V™, and Palm VII™ handheld devices; IBM WorkPad, WorkPad 30X and WorkPad c3 PC Companions; Symbol SPT 1500 and 1700 series bar code scanning devices; and QUALCOMM pdQ smartphone. And you'll begin to see some of the possible ways the Palm Computing platform can work to extend your enterprise.

While you'll find many existing products and solutions listed in the Enterprise Solutions Guide, you won't find them all because the list is growing every day. For a complete list of products and solutions, as well as system requirements, supported platforms and languages, release dates, and other information, visit www.palm.com/enterprise.

About Platinum Solutions　(P)

Platinum solution products have successfully passed rigorous compatibility testing created by 3Com Corporation and administered by an independent testing company, Quality Partners, Inc. Companies with Platinum solutions have made an investment in the Palm Computing platform and are committed to providing customers with the best user experience.

Note: Information contained herein was supplied by each vendor. Palm Computing has made every attempt to ensure accuracy and consistency of data, but cannot make any guarantees. Please check with specific vendors for more details.

Enterprise Applications

ASSET TRACKING & INVENTORY

Enterprise Applications from SAP Labs

SAP, the world's leading provider of enterprise software solutions, has created and extended applications designed for use on Palm Computing® platform devices. These applications include Fixed Asset Inventory Tracking, Project System Updates, Inventory Cycle Counts and Travel Expense. SAP plans to provide applications using a standard architecture, in compliance with the SAP Business Framework.

www.sap.com • (610) 355-2500

On Hand from Stevens Creek Software

On Hand 1.1 allows you to take inventories or perform asset tracking using a Symbol SPT 1500 or other Palm Computing platform device. Includes Macintosh and Windows conduits to create desktop inventory files.

www.stevenscreek.com • (800) 823-4279

Star Receiver from Bear River Associates

Star Receiver is an advanced receiving system for tracking incoming packages for large business and government organizations. The system integrates with employee database, corporate intranet, purchasing, AP, and other enterprise applications — increasing the effectiveness of your receiving department, eliminating missing packages, and helping your purchasing department to manage vendors.

www.bearriver.com • (510) 834-5300

CUSTOMER RELATIONSHIP MANAGEMENT & ORDER ENTRY

Oracle Mobile Field Sales from Oracle

Oracle, the world's leading provider of enterprise solutions, is the first to deliver enterprise applications for selling on handheld devices. Sales representatives can use Palm Computing platform devices to view and interact with their sales data, and synchronize from the field directly back to the enterprise sales server. Oracle Field Sales/Palm Devices is part of Oracle's Customer Relationship Management suite.

www.oracle.com/ebusiness/crm_mobile.html • (800) ORACLE1

Pendragon OrderForms from Pendragon Software

Pendragon OrderForms 1.2 is point-of-sale software for the Palm Computing platform that provides a fast and effective way for the mobile salesperson to enter orders, compute totals and capture customer approvals. With a catalog capacity of 50,000 items and an advanced synchronization algorithm, Pendragon OrderForms provides enterprise-class order entry capabilities.

www.pendragon-software.com • (847) 816-9660

Pivotal Relationship from Pivotal

Pivotal Relationship is the leading 360° Customer Relationship Management application designed for mid-range Microsoft BackOffice installations. Pivotal Relationship allows you to exchange information between your Palm Computing platform device and your desktop Microsoft Outlook, which then automatically updates the enterprise-wide Pivotal Relationship 360° Customer Relationship Management system— all in one step.

www.pivotal.com • (877) PIVOTAL

$alesLink from Encompass Software

$alesLink is an innovative sales automation solution based on Lotus Notes that uses HotSync technology to exchange data with Palm Computing platform devices. Your sales reps get colorful, graphic records and navigators; contact management; customer database; pipeline and opportunity management; custom and form letters; mass mailing; electronic call reports; quotes; order entry and processing; and much more anytime, anywhere.

www.encompassoft.com • (800) 400-3588

SalesWarrior from iambic Software

SalesWarrior 2.01 lets you leverage your Palm Computing platform device to track sales opportunities, leads, referrals, actual sales, costs, and commissions. You can sort and filter the sales opportunity data, copy it to the Palm Computing platform device Memo Pad application, and then export the data to your PC. On your desktop, you can view the data in a text file, Microsoft Word document, or Microsoft Excel spreadsheet.

www.iambic.com • (800) 730-5370

Take an Order! from Stevens Creek Software

Take an Order! on a Palm Computing platform device gives you an office that travels with you. Once you've created your order, quotation, or delivery report, you can refine it. Add a discount for the order from a pop-up list, and add tax or shipping as appropriate. For actual sales, indicate a cash, check, or credit card sale. If you're dealing with an existing customer base, just tap the "Sold To" button and you'll see your entire Palm Computing platform Address Book.

www.stevenscreek.com • (800) 823-4279

DATA COLLECTION

Datastick Handheld Data Acquisition System from Datastick Systems

MyCorder is the first multi-application, data acquisition system for the Palm Computing® platform. Includes Datastick peripheral, Datastick Connection handheld software, sensor cables, Macintosh and PC conduits. Simultaneously record pressure, temperature, acceleration, magnetism, etc. on six channels. Store and view measurements (histogram, graph, numeric modes) on your Palm Computing handheld device, then transfer to your desktop computer.

www.datastick.com • (408) 615-5774

FS2000 for Palm Computing® Platform from Impact Innovations Group

FS2000 is a food management system designed to meet the unique requirements of the military. The system provides improved business processes in food service operations, point-of-sale capability, automated headcount capability, and an added decision support module to allow high-level managers to make better management decisions. The Palm Computing platform device automatically extracts data from soldier IDs and prompts the attendant as appropriate. At the end of the day, the Palm Computing device is synchronized with the back office system and all information is transferred from the Palm Computing handheld into the FS2000 Automated Headcount and Cash Management modules.

www.iiginc.com • (410) 872-5400

imagiLab from ImagiWorks

imagiLab for Palm Computing platform handheld devices provides a computer laboratory that enables students to collect and visually analyze scientific data. With ImagiLab, teachers can move science out of the classroom and conduct investigations at home, at school, or at a nearby pond — wherever scientific inquiry takes them. With the click of a single button you can move data onto a desktop computer for further analysis.

www.imagiworks.com • (650) 938-7451

FIELD FORCE AUTOMATION

Enterprise Link from Interteam Software

Enterprise Link is a client-side solution that allows engineering departments to enter and manage work order requests. The solution ties into MQ Series and Lotus Notes with one conduit to allow users to synchronize at any location, with any PC, and tie into multiple back ends. Ideal for nursing, trucking, and other industries where individuals roam from place to place.

www.interteamsoftware.com • (804) 779-0255

Help! from GWI Software

The Help! family of customer service and help desk products boasts a customer base of over 550 installed enterprise clients worldwide. GWI's Help! suite supports standard ticket submission, routing, escalation, reporting, and tracking features, as well as integration with leading sales force automation programs. Help! for Lotus Notes and Help! for the Web are robust, commercial shrink-wrapped products.

www.gwi.com • (360) 397-1000

posPAD from FUN Kommunikationssysteme

posPAD is an intelligent mobile ordering system with touch-screen operation and cordless communication for hospitality automation. The combination of graphical and textual display means that articles can be selected quickly. The DECT cordless modem enables interference-free communication with the cash desk and the back office.

www.fun.de • +49-721-964480

Remedy Link for the Palm Computing Platform from Remedy ⊖

Remedy Link integrates problem management, problem resolution, asset inventory, change tasking, measurement, and reporting functions into a single, easy-to-use application. Remedy Link for the Palm Computing platform extends access to handheld computing devices, enabling customers to integrate their internal help desks into their business operations and reduce problem resolution time for the IT organization.

www.remedy.com • (650) 903-5200

PROJECT MANAGEMENT

Changepoint from Changepoint Corporation

Changepoint is a Lotus Notes infrastructure solution that allows mobile users to status projects with Palm Computing platform devices. Changepoint provides complete workgroup management solutions to global consulting services firms and provides integration and training services for clients like Lotus Consulting, Deloitte Touche, Ernst & Young, and Coopers & Lybrand.

www.changepoint.com • (800) 263-7189

in-Site from Bidcom

in-Site is a hosted Internet application for project management in the building industry. An underlying workflow technology allows all participants from owners to subcontractors to collaborate on real-time information. in-Site also offers a Palm Computing platform extension to the solution enabling mobile project participants the freedom to access and input complete project data from virtually anywhere.

www.bidcom.com • (415) 882-1888

Punch List from Strata Systems ⊖

Revolutionize the way you manage projects with Punch List. Track tasks, report errors, monitor progress and update project schedules in Primavera or Microsoft Project — all with the push of a button. Assembled task lists from one or several Palm Computing platform device users are automatically printed, faxed or e-mailed to project resources.

www.punchlist.com • (888) 336-3652

Industry Applications

FINANCE

Handheld Banking Solution
from Banco Mercantil/On Site-Corporación Drx

Drx has created the world's first handheld banking solution for Venezuela's Banco Mercantil. The solution's benefits include the ability to access account balances, transfer funds, bill pay remotely using wireless or POTS modem connections. Benefits include increased ransactions, better communication with customers (via e-mail), and increased consumer market share.

www.corporaciondrx.com • **+58-2-264-0235**

Handheld Banking/Encryption Solution from Irion S.A.

Irion S.A. has created a powerful handheld banking and encryption solution using the Palm Computing® platform. Target customers include any bank currently operating or planning PC banking service to its customers. Benefits include fully encrypted remote access to account balances, money transfers, bill pay, and e-mail services. Major benefits to the bank include increased transactions and better communication with customers via e-mail.

www.irion.com.ar • **(541) 315-5556**

Mobile Banking, Brokerage and Content
from 724 Solutions

724 Solutions' application transforms any Palm Computing platform device into a mobile access channel for customer-focused financial institutions, merchants and information providers. This solution is the first to provide the mobile user with immediate, personalized, easy access to their trusted financial and merchant relationships. Users can securely access their financial relationships to check account balances, pay bills, move funds between accounts, request credit card advances, trade stocks and more.

www.724solutions.com • **(416) 226-2900**

Quicksheet from Cutting Edge Software   Ⓟ

Quicksheet 3.1 is a fully functional spreadsheet application available for Palm Computing handheld devices. It uses HotSync technology to automatically import or export entire spreadsheets to or from Microsoft Excel. Quicksheet includes 45 built-in functions with support for many scientific, financial, date/time and statistical calculations and numerous cell formatting and editing functions.

www.cesinc.com • **(800) 991-7360**

Reuters MarketClip from Reuters and Aether Technologies

Reuters MarketClip is the first interactive, wireless system that delivers real-time, mission-critical financial data and news anytime, virtually anywhere. The system provides the mobile user with access to: U.S. equity and mutual fund quotes, options chains, charts, news headlines, market summaries, industry sectors and groups, and numerous alert functions. Reuters MarketClip uses Palm Computing platform devices, coupled with Novatel Minstrel IP Wireless Modems.

www.marketclip.reuters.com • **(888) 9STOCKS**

Virtual Lender from Mortgage Internet Technologies

The virtual lender short-form loan application is designed to work in conjunction with the Virtual Lender Internet system for mortgage lenders. The loan originator fills out the short-form application — containing the minimum data fields required by Fannie Mae for loan approval — on a Palm Computing platform device, then transfers the application via the Internet or imports to the marketing company for approval and processing.

www.vlender.com • **(888) 505-6688**

HEALTHCARE

CEDS Pocket from ClinEffect Systems

CEDS offers healthcare providers a friendly way to replace the mountains of paper in the clinic with accurate, accessible, timely electronic data. Charges are captured with a Palm Computing platform device at the point-of-care and then synchronized with a desktop enterprise application. Capture charges wherever you practice medicine.

www.clineffect.com • **(888) VUE-CEDS**

HealthLogs by SoftCare Clinical Informatics

HealthLogs link patients and their caregivers through automated Web-linked sharing of data captured during self-monitoring on Palm Computing platform devices. Applications encompass extensive decision support and behavioral tools to increase compliance and effect positive outcomes. Tested in National Institutes of Health (NIH)-sponsored clinical trials. Modules for diet, exercise diabetes, hypertension, asthma, pregnancy, and depression.

www.dietlog.com • **www.softclin.com** • **(206) 780-1729**

Mobile MedData from Medical Communications Systems

Mobile MedData is an innovative application that transforms your Palm Computing platform device into a powerful patient information manager. Medical professionals can now enter, track, and maintain patient data, including history, assessment and plan, labs and prescriptions, and analyze that information using focus and graph tools. Mobile MedData computes complex medical calculations and is customizable to any specialty using robust database tools.

www.medcomsys.com • **(800) 741-0981**

Server Synchronization & Database Access

ASL-Connect from Advance Systems

ASL-Connect is a server synchronization product around which you can develop, deploy and manage mobile computing solutions using Palm Computing® platform devices. It enables multiple Palm Computing platform devices to remotely connect — over any networking infrastructure — directly to corporate systems. It provides synchronization between the Palm Computing device and any database, including Microsoft Exchange and Lotus Notes.
www.asl.com • **(888) 222-1978**

AvantGo Server from AvantGo

AvantGo Server 2.12 and AvantGo Client enable a new class of mobile applications by simplifying user administration, enabling remote access and delivering high-performance transactions between Palm Computing platform devices and enterprise data resources. AvantGo Server communicates over any existing wireless or Internet service. The server's multi-threaded architecture supports a one-to-many relationship between servers and handheld devices. In addition, AvantGo Server can maintain both online and batch sessions with handheld devices.
www.avantgo.com • **(888) 884-8812**

IBM Mobile Connect from IBM

IBM Mobile Connect is a new computing technology that provides users of Palm Computing platform handheld devices and wireless phones with direct access to corporate networks. IBM Mobile Connect manages the automatic exchange of data between handheld devices and corporate networks. Through this system, a handheld device can be used to execute basic communications such as e-mail and scheduling for corporate calendars. And, for the first time, these devices can provide direct access to corporate databases, enhancing efficiency and productivity for customized applications including order taking and inventory control.
www.ibm.com • **(800) 772-2227**

Intellisync Anywhere from Puma Technology

Designed specifically to address the needs of the enterprise, Intellisync Anywhere software keeps your mobile workforce current with remote and LAN-based data synchronization between Microsoft Exchange and Palm Computing platform devices. Easy to set up, deploy, and administer, Intellisync Anywhere provides mobile users with "anytime, anywhere" access to critical information.
www.pumatech.com • **(800) 774-PUMA**

Oracle Lite from Oracle Corporation

Oracle, the leading provider of enterprise solutions, now brings mobile data solutions for the Palm Computing platform with Oracle Lite 3.5. This proven small-footprint database handles the data storage and data replication between multiple Palm Computing platform devices and Oracle database servers. With broad development tool support and easy setup, creating an enterprise application for the Palm Computing platform has never been simpler.
www.oracle.com/mobile • **(800) ORACLE1**

Pylon ServerSync from Globalware Computing

Pylon ServerSync keeps dial-up and network-connected users synchronized with the first fully integrated server solution for Lotus Notes and Palm Computing platform devices. Powerful multithreaded server supports multiple simultaneous sessions. Centralized Notes configuration provides easy administration of large-scale rollouts. Pylon ServerSync is implemented as an integrated Domino add-in task. Full implementation of the Domino security model means secure access requiring no additional administration.
www.globalware.com • **(312) 573-9500**

ProxiWare Server from ProxiNet

ProxiWare Server filters, compresses, reformats and repurposes existing Web content for handheld devices. ProxiNet's Cluster Platform provides an architecture that makes it easy to build modules that can be connected into applications, but shields authors from failure management, fault tolerance, and scalability concerns that are essential to Internet services.
www.proxinet.com • **(510) 923-9160**

ScoutMTS from Riverbed Technologies ℗

The Scout Enterprise Architecture is an application development platform that connects the mobile workforce to enterprise information. It also provides a scalable and extensible service framework. This facilitates seamless communication of business-critical data to and from a deployed base of mobile users. Scout further enables the sharing of information between core business platforms and an arbitrarily large deployment of handheld devices through high-performance data synchronization techniques that employ an optimized messaging infrastructure tailored for the handheld platform.
www.riverbedtech.com • **(703) 847-3303**

SyncKit from Synchrologic

SyncKit is synchronization software enabling mobile enterprise applications. It synchronizes relational data from any database server to a Palm Computing platform device. The SyncKit Rules Builder tool is a visual interface to implement business rules and data sharing, saving corporate developers from having to write complex code for synchronization.
www.synchrologic.com • **(888) 345-SYNC**

UltraLite Deployment Option of
SQL Anywhere Studio from Sybase

Sybase's UltraLite Deployment Option of SQL Anywhere Studio is the first local, SQL-based relational database optimized for the Palm Computing® platform. Organizations can customize the capabilities of the database to match the memory requirements of an application running on Palm Computing platform devices; the customized database can have a memory "fingerprint" as small as 50K. MobiLink server synchronization technology allows users to download and upload mission-critical data from major corporate databases, ensuring that up-to-date information is available both at their fingertips and at the corporate office.
www.sybase.com • (800) 8SYBASE

WaveSync from WaveWare Communication

WaveSync 1.0 is an enterprise level, multi-user synchronization server that substantially accelerates synchronization over wireless and Internet links. WaveSync provides sophisticated management tools and strengthened user authentication required for deploying and managing large or small populations of handhelds. WaveSync retains the Palm Computing platform conduit API, so it supports existing client/server applications with little or no modification.
www.waveware.net • (619) 558-1233

Security & Administration

SECURITY

ActivCard Gold/Corporate Wallet from ActivCard

With the Corporate Wallet, ActivCard Gold gives companies a new way to securely store, manage and control corporate credentials. Corporate credentials may include dynamic passwords, digital signature, static credentials and electronic cash. The credentials that reside in the corporate wallet allow employees, partners or customers to securely communicate and confidently do business online. ActivCard's password technology, through smart cards and tokens, can be embedded in Palm Computing platform devices, allowing secure access to business and personal information.
www.activcard.com • (510) 574-0100

Defender for the Palm Computing® Platform from Axent

Defender transforms a Palm Computing platform device into a handheld token to create single-use passwords. The $25 Defender works with a user's PC or can authenticate to the private network from the Palm Computing device, via a Palm Computing modem. The transaction is transparent and only requires a user's PIN. The Defender Security Server validates the password at the corporate site.
www.axent.com • (888) 44-AXENT

e.ID for the Palm Computing Platform from
Secure Computing Corporation

e.ID for the Palm Computing platform empowers users with confidentiality and integrity when accessing applications, databases and networks locally, remotely, and in workgroups. Protecting Palm Computing platform device user identity with strong authentication, e.ID for the Palm Computing platform enables consistent logon and security, whether using Palm Computing platform devices, laptops or desktops to access SafeWord-enabled networks and resources.
www.securecomputing.com • (800) 379-4944

JAWS MEMO from JAWS Technologies

JAWS MEMO is designed to secure valuable information created and stored in the Palm Computing platform device Memo application. This unique and powerful security software solution replaces the existing Memo Pad with a completely secure Memo application providing users with very strong (4096-bit), fast and easy-to-use encryption capabilities. Keep your data safe. Download a free trial copy of L5 Data Encryption Software at:
www.jawstech.com • (888) 301-5297

Login Script Enhancement from Palm Computing

The Palm Login Script Enhancement provides a new script command for use of challenge-response token cards for remote access authentication, and a plug-in interface for custom extension of login scripts. This capability is targeted for mobile professionals connecting their Palm Computing® platform devices via modem to corporate networks.
www.palm.com/devzone • **(800) 881-7256**

MicroToken from Confinity

Confinity MicroToken replaces your challenge-response token card. Save money by eliminating the extra hardware challenge-response tokens you don't need. Save effort by reducing the complexity that comes with difficult-to-use hardware tokens. Save time by configuring a token in seconds using the MicroToken configuration wizard.
www.confinity.com • **(650) 566-3645**

Secure Memo Pad from Certicom

This replacement for the Palm Computing device's built-in Memo Pad allows you to securely enter, read, and organize sensitive information on your device. If you have a Palm Computing platform handheld, you probably already have sensitive information in your Memo Pad that should be protected from non-authorized viewers. This freeware is simple to use and gives you industrial strength (163-bit ECC public-key) security from Certicom.
www.certicom.com • **(510) 780-5400**

SecurID from Security Dynamics Technologies

SecurID for the Palm Computing platform is authentication software that provides an easy, one-step process to positively identify network and system users and prevent unauthorized access. SecurID for the Palm Computing platform generates new, unpredictable access codes that automatically change every 60 seconds, making it an ideal solution for secure remote access or virtual private networks. It can also be used in conjunction with cryptographic technology from RSA Data Security. Incorporating SecurID into the Palm device provides crack-proof security in one easy-to-use package and eliminates the need for the user to carry a separate hardware token.
www.securitydynamics.com • **(800) SECURID**

Secure Networking Software Development Kits from RSA Data Security

Technologies within the RSA BSAFE product line were customized to empower your Palm Computing platform device to allow secure access and synchronization of application data between the device and a network information server. These SDKs can be used to provide privacy, integrity, and authentication enabling you to securely transfer data over a wide range of communication channels (telephone, wireless, Ethernet, etc.), as well as pass through existing access control servers (Windows NT Remote Access Server, firewalls, Ascend modem pool, etc.).
www.rsa.com • **(800) 782-5453**

SSL Plus for the Palm Computing® Platform from Certicom

SSL Plus provides plug-and-play SSL integration enabling developers to add the most popular security technology to their networked applications and embedded systems. SSL Plus is used by companies such as AT&T, Intuit, Lotus, Oracle, Lucent Technologies and Philips.
www.certicom.com • **(510) 780-5400**

ADMINISTRATION & UTILITIES

Login Script Enhancement from Palm Computing

The Palm Login Script Enhancement provides a new script command for use of challenge-response token cards for remote access authentication, and a plug-in interface for custom extension of login scripts. This capability is targeted for mobile professionals connecting their Palm Computing platform devices via modem to corporate networks.
www.palm.com/devzone • **(800) 881-7256**

Unicenter TNG from Computer Associates

Computer Associates has integrated Palm Computing platform devices with Unicenter TNG, making them part of CA's award-winning end-to-end enterprise management solution. Corporate IS management can now easily provide the benefits of handheld computing by utilizing Unicenter TNG to deploy and manage Palm Computing platform-based application solutions for mission-critical computing requirements. Available Q4/99.
www.cai.com • **(800) CALL-CAI**

E-mail, Web & Paging

E-MAIL

BeamLink from JP Systems Ⓟ

BeamLink is the first e-mail software that enables wireless e-mail and messaging from a Palm III or Palm V series handheld through the Skytel/PageNet/MCI AccessLink II 2-way pager using infrared. Users can send and receive e-mail to any e-mail address, and pages to any Skytel pager. For the first time, a truly interactive e-mail solution that also has extensive network converage is available to both consumer and corporate clients alike!
www.jpsystems.com • **(888) 665-2460**

EasySync for Lotus Notes from Lotus Ⓟ

EasySync for Lotus Notes Release 2.1 provides bi-directional data synchronization between Lotus Notes and market-leading Palm Computing® platform devices. Lotus Notes users can exchange contacts, to-dos, memos, calendar and e-mail data between their desktops and Palm Computing platform devices. EasySync for Lotus Notes is priced for a single license with Lotus volume discounts. EasySync supports all Palm Computing platform products.
www.lotus.com/calendar • **(800) 872-3387 Ext. D717**

Eudora from QUALCOMM

Eudora Pro and Eudora Light synchronize with Palm Computing platform devices to extend the most widely used e-mail system on the Internet to your fingertips. With one of these e-mail applications, Palm Computing platform device users can access their e-mail from across campus or across the country. They can download messages, read, respond, and send messages conveniently over the Internet.
www.qualcomm.com • **(800) 238-3672**

Intellisync for the Palm Computing® Platform from Puma Technology

Intellisync from Puma Technology keeps you current with direct, two-way synchronization between your PC and your Palm Computing platform device. Intellisync automatically synchronizes your contacts, calendar, to-do list, notes, e-mail messages, and expenses with the PIM, contact management, and groupware applications on which you depend every day.
www.pumatech.com • **(800) 774-PUMA**

MultiMail Conduit from Actual Software

Synchronize your e-mail with your desktop e-mail program. MultiMail Conduit works in conjunction with MultiMail PRO to provide a complete e-mail solution. Use one e-mail package in the office and on the road. Supports IMAP4 as well as any MAPI client. Supports attachments and multiple accounts.
www.actualsoft.com • **(978) 475-2690**

MultiMail PRO from Actual Software Ⓟ

MultiMail PRO 2.2 is a direct Internet e-mail client that runs on your Palm Computing platform device. MultiMail PRO supports POP3, SMTP, and IMAP4 and is compatible with Microsoft Exchange, Novell GroupWise, and Lotus Domino. Features a unique plug-in architecture that lets you view most common attachment types. The perfect solution for executives on the go.
www.actualsoft.com • **(978) 475-2690**

One-Touch Mail from JP Systems Ⓟ

One-Touch Mail is a leading e-mail solution for the Palm Computing platform. It boasts an award-winning interface and powerful desktop-like features which allow the user to send and receive e-mail and attachments, and to use multiple accounts on the road using a Palm™ Modem or any wireless modem. One-Touch Mail is the winner of the "Best Handheld Software of the Year" award from Mobile Computing Magazine and TAP!. It can be customized upon request to work with a corporate ISP and currently supports SMTP/POP3/IMAP4 protocols.
www.jpsystems.com • **(888) 665-2460**

Palmeta Mail from Palmeta Software Ⓟ

With Palmeta Mail 1.73, your Palm Computing platform device Memo Pad becomes your e-mail inbox/outbox. Supports Netscape Communicator/Navigator Mail, or MAPI-enabled e-mail systems including: Microsoft Exchange, Windows Messaging, Outlook97/98 or Internet Explorer 4.0, Outlook Express, Lotus Notes, QUALCOMM Eudora and Novell GroupWise. Works with all Palm Computing platform devices.
www.palmeta.com • **(603) 425-2492**

ProxiMail from ProxiNet

ProxiMail delivers rich e-mail access to handheld devices, including notification, security, filtering, and attachment handling. ProxiMail consists of a lightweight client for handheld devices and an e-mail proxy which, in conjunction with existing corporate or consumer back-end mail servers, allows rich e-mail access to the handheld device.
www.proxinet.com • **(510) 923-9160**

WEB

AvantGo Client from AvantGo Ⓟ

AvantGo Client 1.1 is a software application for handheld devices that combines a highly efficient Web browser with dynamic input capabilities, such as forms, that generate responses based on a user's input and the type of device a user carries. It gives mobile professionals an intuitive way to find and update information on their handhelds, and gives developers a feature-rich, extensible base for delivering enterprise applications.
www.avantgo.com • **(650) 638-3399**

InfoRover from Pendragon Software Ⓟ

InfoRover 1.5 conveniently downloads Web content to PCs, converting the content for synchronization with Palm Computing platform devices. The handheld client displays graphics and searchable hypertext. Use this "push" technology to deliver manuals, catalogs, procedures and corporate communications to mobile workers.
www.pendragon-software.com • **(847) 816-9660**

Netscape Communicator from Netscape

Communicator 4.5.1 includes a collection of new features designed to help users navigate the Web, find the information they want, and communicate with others faster and easier than ever before. Featuring Smart Browsing, high-performance Internet e-mail, and improved support for Palm synchronization. Netscape takes a major step forward in improving the Web experience.
www.netscape.com • (650) 937-2555

ProxiWare Server from ProxiNet

ProxiWare Server filters, compresses, reformats and repurposes existing Web content for handheld devices. ProxiNet's Cluster Platform provides an architecture that makes it easy to build modules that can be connected into applications, but shields authors from failure management, fault tolerance, and scalability concerns that are essential to Internet services.
www.proxinet.com • (510) 923-9160

ProxiWeb from ProxiNet

ProxiWeb enables Web access and personalized information delivery services, overcoming hardware constraints and slow wireless communications speeds to provide a full-featured, graphical Web experience for handheld devices. ProxiNet's technology transforms, filters and compresses Web content for thin clients and increases throughput by 5 to 10 times.
www.proxinet.com • (510) 923-9160

PAGING

AccessLink II 2-Way Pager from Glenayre

The AccessLink II combines elegant design and technological integration to bring you a device only half the size of other two-way pagers. Its small size, ergonomic button controls, and long battery life deliver a simple yet feature-rich solution to meet all your paging needs. You can receive messages, reply to them and even originate them directly on the device. These capabilities all translate into more productive business communication.
www.glenayre.com

BeamLink from JP Systems ⓟ

BeamLink is the first e-mail software that enables wireless e-mail and messaging from a Palm III or Palm V series handheld through the Skytel/PageNet/MCI AccessLink II 2-way pager using infrared. Users can send and receive e-mail to any e-mail address, and pages to any Skytel pager. For the first time, a truly interactive e-mail solution that also has extensive network coverage is available to both consumer and corporate clients alike!

TRAVEL

Clock III from Little Wing Software Development

Here's the missing link for your Palm Computing platform handheld device—a multi-function alarm clock, world clock, stopwatch and timer. Clock III displays the time in an easy-to-read 46-point bold typeface with hours, minutes and seconds. Simultaneously displays the time and date in over 400 different countries, cities and time zones around the world. All functions work, even when the handheld is powered off.
www.lwsd.com • **(800) 741-9070**

Quo Vadis by MarcoSoft

Quo Vadis is the only mapping system that labels roads the way you expect, and indicates your destination. Travelers will love the huge map library and the powerful street, intersection, and landmark searching and tracking. Multiple grayscale maps can be stored, zoomed and drawn simultaneously, forming a seamless, single map. Also supports GPS.
www.marcosoft.com • **(248) 853-5353**

StreetSigns from TrekWare Corporation ⓟ

StreetSigns 2.0 puts database-driven U.S. city maps on your Palm Computing platform device. Locate streets, addresses—even intersections. Select contacts from your Address Book and automatically locate them on the map. Users can access MapDepot, a growing online repository with hundreds of free city maps.

Palm Computing & OEM/Licensee Devices

PALM COMPUTING DEVICES

PalmPilot™ Professional Handheld Device

Now big organizing power comes in a pocket-sized package. The PalmPilot™ Professional Edition device lets you store thousands of names, addresses, appointments, expense items, even e-mail. Back-up and exchange information with your desktop PC and popular PIMs at the touch of a button. At just 4.7" tall and weighing in at just 6 oz., PalmPilot organizers are the #1 way to stay connected and get organized.
www.palm.com • **(800) 881-7256**

Palm III™ Handheld Device

Put important information at your fingertips with the pocket-sized Palm III device. Store thousands of names addresses, appointments, memos, to do items, expense items, even e-mail. Back-up and exchange information with your desktop PC and popular PIMs with the touch of a button. "Beam" files and applications to other IR-enabled Palm Computing® platform devices. Palm III handheld is the award-winning choice in personal organization.
www.palm.com • **(800) 881-7256**

Palm IIIx™ Handheld Device

Small, smart, totally connected, the Palm IIIx device has twice the storage of the award-winning Palm III device and room to expand. Get instant access to your schedule, thousands of addresses, to do items, memos, expenses, e-mail, andplenty of applications. Add more storage at any time. Back up and exchange information with your desktop computer and popular PIMs at the touch of a button. It's a big value in a small package.
www.palm.com • **(800) 881-7256**

Palm V™ Handheld Device

One look, and you'll know the Palm V is something special. Its ultra-thin, anodized aluminum casing appeals to your sense of style. At just 4 ounces, it's ultra-light. DateBook, Address Book, To-Do List, Memo Pad, Expense and E-mail applications synchronize to your desktop computer with one touch. Long-life lithium-ion rechargeable battery provides up to a month's operation on the road and the advanced LCD screen is razor sharp. The Palm V device lets you organize in style.
www.palm.com • **(800) 881-7256**

Palm VII™ Handheld Device

The Palm VII handheld is more than a pocket-sized device that's always in sync with your desktop computer. It's your wireless link to the Internet. In an instant, you can access important information from the Internet, like stock quotes, news items and more from virtually anywhere. Or send and receive quick text messages to and from anyone with an Internet e-mail address. It's the organizer that connects you to the best of the Internet. For more information on development tools and to view the product whitepaper, visit the Palm Web site. Available Q3/99.

Pulsedata Institute (PDI)

PDI uses Palm Computing platform devices to help collect data at the source. The company specializes in healthcare applications that provide solutions for clinical outcomes, disease management, clinical trial and patient satisfaction data collection, formulary compliance, patient education, and health status monitoring. PDI will also analyze the data and report findings on request.

SoftCare Clinical Informatics

SoftCare Clinical Informatics is an experienced team of clinicians and engineers specializing in custom healthcare solutions incorporating Palm Computing platform devices. SortCare offerings include:
- Advanced clinical decision support tools
- Clinical trials of devices and pharmaceuticals
- Home health and consumer health applications
- Wireless client-server Web-connected distributed computing systems

Partners include Dartmouth, Harvard-MIT, and the National Institutes of Health.

TRG Products

TRG combines knowledge of Palm Computing platform device hardware and software with custom engineering skills, technical support services and corporate information technology experience to create unique solutions for enterprise deployment of handheld devices.

www.superpilot.com • **(515) 252-7522**

Waverley Software Design

Waverley Software Design has compiled a successful record of developing state-of-the-art solutions ranging from demos and shrink-wrapped applications to enterprise solutions which exchange data between handheld devices and enterprise systems. Technical expertise, product design experience, excellent references and customer-centered approach with emphasis on good communication assure you of an outstanding Palm Computing platform solution.

Whittman-Hart

Whittman-Hart has been providing integrated solutions for more than 15 years. Specialties include client/server, open systems, midrange, and enterprise technology solutions. Whether Lotus Notes, SAP, or a custom solution, Whittman-Hart can provide value during each step of the software development life cycle. By implementing on the Palm Computing platform, Whittman-Hart makes your IT investments mobile. With over 2000 professional consultants and 14 offices across the U.S., the company offers comprehensive service in five major business areas: solution strategies, packaged software solutions, custom applications, network-enabled solutions, and interactive.

Training, Resources & Support

TRAINING

Palm Computing is pleased to announce the following premier members of the Palm Training Alliance. These partners provide high-quality training on the Palm Computing® platform. Training can take place either on-site or at the training vendor's facilities. Other partners continue to be added. For more information, contact Nancy Levin at:
(408) 326-2609 or nancy_levin@palm.com

Digital Education Systems and O'Reilly & Associates

Introduction to the PalmPilot is designed to give you all the basic information you need to get the most out of your PalmPilot. Based on David Pogue's best-selling book by O'Reilly & Associates, *PalmPilot: The Ultimate Guide*, the course answers your questions about how to use key Palm Computing platform device features.
www.digitaled.com • (303) 573-1284

ExecuTrain

Computer desktop software and system administration training worldwide.
www.exectrain.com • (770) 753-3318, Mark Blount

Franklin Covey

Time and life management training held primarily in the U.S. and Europe.

O'Reilly & Associates Books

Palm Programming: The Developer's Guide
1st Edition December 1998
By Neil Rhodes & Julie McKeehan
Emerging as the best-selling handheld computers of all time, Palm Computing platform devices have spawned intense developer activity and a fanatical following. Used by Palm Computing in developer training, this tutorial-style book shows intermediate to experienced C programmers how to build a Palm Computing platform application from the ground up. Includes a CD-ROM with source code and third-party developer tools.
www.oreilly.com/catalog/palmprog • (800) 998-9938

PalmPilot : The Ultimate Guide
1st Edition June 1998
By David Pogue

This PalmPilot™ "bible" covers the PalmPilot and the new software and features of the Palm III™ handheld, as well as OEM models such as the IBM WorkPad. Dense with undocumented information, it contains hundreds of timesaving tips and surprising tricks to help both intermediate and advanced users master this exciting new device. Comes with the "Everything PalmPilot" CD-ROM.

SUPPORT

Palm™ Solution Provider Program

The Palm™ Solution Provider Program is an alliance with a singular goal: to make the most out of the industry-leading handheld computing platform. If you create solutions, applications, peripherals or accessories for the Palm Computing® platform, you are invited to become a Palm Solution Provider. Participation in the Palm Solution Provider Program offers you a variety of benefits—all designed to help you create and promote solutions for the award-winning Palm Computing platform.

Matrices

Palm Computing® Platform Devices

Product name	Manufacturer name	Characteristics
PalmPilot™, Palm III™, Palm IIIx™, Palm V™, Palm VII™ handheld devices	Palm Computing	Award-winning handheld devices offering ample storage, instant PC synchronization using HotSync® technology, and all the powerful desktop and organizer applications you need
Franklin Covey Editions: PalmPilot, Palm III, Palm IIIx, Palm V handheld devices	Franklin Covey	Handheld devices combining the power and connectivity of Palm Computing® platform devices with Franklin's proven time and life management principles
pdQ smartphone	QUALCOMM	The industry's first all-in-one CDMA digital phone and pen-based handheld offering crystal clear voice calls, full access to 3000+ applications available for the Palm Computing platform, and integration with wireless and telephony features
SPT 1500, SPT 1700 series bar code scanning devices	Symbol Technologies	New family of Palm OS™-based devices offering integrated bar code scanning, ruggedization and wireless LAN capability (1700 series only) for industries like retail, transportation, logistics, warehousing and healthcare
WorkPad 20X, WorkPad 30X, WorkPad c3 PC Companions	IBM	A companion solution for a broad range of PC users offering infrared synchronization with IBM ThinkPad laptops, technical support 24 hours x 7 days a week, and Lotus EasySync conduit to Lotus Notes
